

Phelps County is feeding and fueling America

# DG FUELS

**Invites You To Attend**

**A COMMUNITY CONVERSATION and TOWN HALL MEETING**

**TUESDAY, DECEMBER 17<sup>TH</sup> AT 5:00PM**  
**HOLDREGE AG CENTER**

Learn more about the project directly from company founder, Mike Darcy, and the Nebraska team responsible for guiding its development.

The new Sustainable Aviation Fuel plant planned for Phelps County promises to have an enormous beneficial impact on the local economy, boosting retail and agricultural sales and creating hundreds of jobs.

DG Fuels will purchase an estimated 1.2 million tons of corn stover annually adding \$144 million into the pockets of farmers in the South Central Nebraska region with no negative impacts on supplies for cattle feed or nutrient replenishment in the fields.

Gov. Jim Pillen has said that bioeconomy projects like DG Fuels will be Nebraska's "Silicon Valley" opportunity. Pillen said these projects will boost the state's rural economy and revitalize the job market.
